

## Promoting Collaboration Between Empowerment and Legislatively Identified Funding Streams (December 2002)

The Iowa Empowerment Board was directed by legislation to regularly make information available identifying funding distributed through specified funding streams. The intent is that community empowerment area boards and the administrators of the programs located within the community empowerment areas shall fully cooperate with one another in order to avoid duplication, enhance efforts, combine planning, and take other steps to best utilize the funding to meet the needs of the families in the areas. It should be noted that some of the programs are annual grants and recipients may not receive funding on an on-going basis.

EMPOWERMENT AREAS	Healthy Families Iowa (HOPES) (Department of Public Health)	Parent education programs funded through the Child Development Coordinating Council (Department of Education)	Pre-school at-risk programs (Shared Visions) funded through the Child Development Coordinating Council (Department of Education)	Parent Education and support through child abuse prevention grants (Department of Human Services)	Home visitation and parent support funding through the safe and stable families grant programs (Department of Human Services)
<b>Brief Program Description</b>	HOPES-HFI is a para-professional/professional partnership providing home visits with families to offer advocacy, education on child development/parenting skills/safety/preventive health, and links into community based services based upon the family's goals.	The parent education and support programs provide services to parents of young children ages birth through three years who are identified as being at-risk.	The Child Development Coordinating Council provides grants for provision of pre-school services for at-risk 3- and 4-year-olds. Funded programs are required to become accredited.	Local child abuse prevention councils provide services funded by state appropriations under the Iowa Child Abuse Prevention Program (ICAPP). The five major programs that these councils provide include: <b>Crisis Nursery</b> - Iowa's crisis nursery programs (CN) provide a temporary place for children to stay during times that their parents face overwhelming circumstances or emergencies. <b>Parent Education</b> - Parent Education (PE) programs teach families through both in-home and home-based instruction. Programs focus on the needs of parents and their children and work with families to increase their healthy interactions. <b>Respite Care</b> - Council respite care (RC) programs provide parents with temporary relief from care giving responsibilities, providing an "out" before the stresses of parenting build up and overwhelm a family. <b>Sexual Abuse Prevention</b> - Sexual Abuse Prevention (SAP) programs focus on making children of all ages aware that they can say "no" when someone touches them or says things that make them uncomfortable. SAP programs typically target school-age children. <b>Young Parents</b> - Young parent (YP) programs provide participants with support, accurate information, and community resources in order to reduce the likelihood of child abuse.	Promoting Safe and Stable Families Federal IV-B funds are targeted for family support and time limited family reunification services. FY03 PSSF funds were distributed to all Decat areas. Contact DHS for more information.
